Geotechnical Testing Journal
Subject Index
Volume 22, 1999

A

Aggregate
Mechanical durability of expanded shale lightweight aggregate (Valsangkar, AJ and Holm, TA), Dec., 329

Atterberg Limits
Absorption Water Content and Liquid Limit of Soils (Sridharan, A and Nagaraj, HB), June, 127
Determination of the plasticity index from flow index (Sridharan, A, Nagaraj, HB, and Prakash, K), June, 175

C

Calibrations
Cell size for water content-dielectric constant calibrations for time domain reflectometry (Suwansawat, S and Benson, CH), March, 3

Capillary pressures
Capillary flow in the geotechnical centrifuge (Lord, AE), Dec., 292

Cell size
Cell size for water content-dielectric constant calibrations for time domain reflectometry (Suwansawat, S and Benson, CH), March, 3

Centrifuge
A Substitute Pore Fluid for Seismic Centrifuge Modeling (Dewoolkar, MM, Ko, HY, Stadler, AT, and Astaneh, SM), Sept., 196

Capillary flow in the geotechnical centrifuge (Lord, AE), Dec., 292
Development of pile driver and load set for pile group in centrifuge (Pan, S, Pu, J, Yin, K, and Liu, F), Dec., 317

Clays
Absorption Water Content and Liquid Limit of Soils (Sridharan, A and Nagaraj, HB), June, 127
Determination of the plasticity index from flow index (Sridharan, A, Nagaraj, HB, and Prakash, K), June, 175
Index properties of illite-bentonite mixtures in electrolyte solutions (Sivapullaiah, PV and Savitha, S), Sept., 257
Influence of reconsolidation techniques and strain rate on the stiffness of undisturbed clays from triaxial tests (LoPrersti, DC, Pallara, O, Cavallaro, A, and Jamiolkowski, M), Sept., 211
Relative moisture and moisture deficiency of desiccated expansive cohesive soil deposits (Hanafy, EA), Dec., 334
Simplified seepage consolidation test for soft sediments (Sridharan, A and Prakash, K), Sept., 235
The effects of varying centerline tube sampling disturbance on the behavior of reconstituted clay (Siddique, A, Clayton, CR, and Hopper, RJ), Sept., 245

Compacted soils
Determining the maximum density of sands by pluviation (Cresswell, A, Barton, ME, and Brown, R), Dec., 324

Compression
Constant rate of strain consolidation equipment and procedure for stabilized soils (Kassim, KA and Clarke, BG), March, 13
Plane strain strength and deformation of sands affected by batch variations and different apparatus types (Yasin, SJ, Umetsu, K, Tatsuoka, F, Arthur, JR, and Dunstan, T), March, 80

Compression tests
Time-dependent stress-strain behavior of soft Hong Kong marine deposits (Zhu, JG, Yin, JH, and Luk, ST), June, 118

Consolidation
Constant rate of strain consolidation equipment and procedure for stabilized soils (Kassim, KA and Clarke, BG), March, 13
Simplified seepage consolidation test for soft sediments (Sridharan, A and Prakash, K), Sept., 235

Constant flow rate
Discussion on "theoretical evaluation of the transient response of constant head and constant flow-rate permeability tests" by M. Zhang, M. Takahashi, R. H. Morin, and T. Esaki (Fox, PJ and Zhu, Y), Dec., 356

Constant volume
Hydraulic conductivity testing of geosynthetic clay liners (GLCs) using the constant volume method (Wang, X. and Benson, CH), Dec., 277

D

Desiccation
Relative moisture and moisture deficiency of desiccated expansive cohesive soil deposits (Hanafy, EA), Dec., 334

Drains
Applied research using a transparent material with hydraulic properties similar to soil (Welker, AL, Bowders, JJ, and Gilbert, RB), Sept., 266

Durability
Mechanical durability of expanded shale lightweight aggregate (Valsangkar, AJ and Holm, TA), Dec., 329

E

Earthquake
A Substitute Pore Fluid for Seismic Centrifuge Modeling (Dewoolkar, MM, Ko, HY, Stadler, AT, and Astaneh, SM), Sept., 196

Elastic properties
A triaxial testing system to evaluate stress-strain behavior of soils for wide range of strain and strain rate (Santucci de magistris, Koseki, J, Amaya, M, Hamaya, S, Sato, T, and Tatsuoka, F), March, 44

Epoxy
Preparation of epoxy impregnated sand coupons for image analysis (Jang, DJ, Frost, JD, and Park, JY), June, 153

F

Filtration
Influence of procedural variables on the gradient ratio test (Fischer, GR, Maré, AD, and Holtz, RD), March, 22

Flow
Applied research using a transparent material with hydraulic properties similar to soil (Welker, AL, Bowders, JJ, and Gilbert, RB), Sept., 266

Flux boundary
Unsaturated hydraulic conductivity of mine tailings under wetting and drying conditions (Rassam, DW and Williams, DJ), June, 144

© 1999 by the American Society for Testing and Materials

Foundation design
Development of pile driver and load set for pile group in centrifuge (Pan, S, Pu, J, Yin, K, and Liu, F), Dec., 317
Non-linear behavior of lateral-loaded pile taking into account the shear stress at the sand (Belkhir, S, Mezazigh, S, and Levacher, D), Dec., 308

Friction
Shear strength characterization of geosynthetic interfaces on inclined planes (Lalarakotoson, S, Villard, P., and Gourc, JP), Dec., 284

G

Geogrid
Changes in interface stresses during pullout tests on geogrid strip reinforcement (Hayashi, S, Shahu, JT, and Watanabe, K), March, 32

Geosynthetic clay liners (GCL)
Hydraulic conductivity testing of geosynthetic clay liners (GLCs) using the constant volume method (Wang, X. and Benson, CH), Dec., 277

Gradiant
Influence of procedural variables on the gradient ratio test (Fischer, GR, Maré, AD, and Holtz, RD), March, 22

H

Hydraulic conductivity
Discussion on "theoretical evaluation of the transient response of constant head and constant flow-rate permeability tests" by M. Zhang, M. Takahashi, R. H. Morin, and T. Esaki (Fox, PJ and Zhu, Y), Dec., 356

Hydraulic conductivity testing of geosynthetic clay liners (GLCs) using the constant volume method (Wang, X. and Benson, CH), Dec., 277

Unsaturated hydraulic conductivity of mine tailings under wetting and drying conditions (Rassam, DW and Williams, DJ), June, 144

I

Illite
Index properties of illite-bentonite mixtures in electrolyte solutions (Sivapullaiah, PV and Savitha, S), Sept., 257
The effects of varying centerline tube sampling disturbance on the behavior of reconstituted clay (Siddique, A, Clayton, CR, and Hopper, RJ), Sept., 245

Image analysis
Preparation of epoxy impregnated sand coupons for image analysis (Jang, DJ, Frost, JD, and Park, JY), June, 153

Interface
Shear strength characterization of geosynthetic interfaces on inclined planes (Lalarakotoson, S, Villard, P., and Gourc, JP), Dec., 284

L

Landfills
Index properties of illite-bentonite mixtures in electrolyte solutions (Sivapullaiah, PV and Savitha, S), Sept., 257

Model studies of the 1988 Kettleman Hills landfill slope failure (Chang, MH, Mitchell, JK, and Seed, RB), March, 61

Liners
Model studies of the 1988 Kettleman Hills landfill slope failure (Chang, MH, Mitchell, JK, and Seed, RB), March, 61

M

Marine deposits
Time-dependent stress-strain behavior of soft Hong Kong marine deposits (Zhu, JG, Yin, JH, and Luk, ST), June, 118

Matric suction
The use of miniature pore pressure transducers in measuring matric suction in unsaturated soils (Muraleetharan, KK and Granger, KK), Sept., 226

Mine tailings
Unsaturated hydraulic conductivity of mine tailings under wetting and drying conditions (Rassam, DW and Williams, DJ), June, 144

Moisture
Fast and accurate techniques for determination of water content in soils (Mendozaz, MJ and Orozco, M), Dec., 301

Mudstone
Shear banding in a sedimentary soft mudstone subjected to plane strain compression (Hayano, K, Maeshiro, T, Tatsuoka, F, Sato, T, Wang, L, and Kodaka, T), March, 67

P

Permeability
Influence of procedural variables on the gradient ratio test (Fischer, GR, Maré, AD, and Holtz, RD), March, 22

Simplified seepage consolidation test for soft sediments (Sridharan, A and Prakash, K), Sept., 235

Permittivity
A complex permittivity measurement system for undisturbed/compacted soils (Shang, JQ, Rowe, RK, Umana, JA, and Scholte, JW), June, 165

Pile drivings
Development of pile driver and load set for pile group in centrifuge (Pan, S, Pu, J, Yin, K, and Liu, F), Dec., 317

Piles
Non-linear behavior of lateral-loaded pile taking into account the shear stress at the sand (Belkhir, S, Mezazigh, S, and Levacher, D), Dec., 308

Plane strain
Shear banding in a sedimentary soft mudstone subjected to plane strain compression (Hayano, K, Maeshiro, T, Tatsuoka, F, Sato, T, Wang, L, and Kodaka, T), March, 67

Plasticity
Absorption Water Content and Liquid Limit of Soils (Sridharan, A and Nagaraj, HB), June, 127

Determination of the plasticity index from flow index (Sridharan, A, Nagaraj, HB, and Prakash, K), June, 175

Pluviation
Determining the maximum density of sands by pluviation (Cresswell, A, Barton, ME, and Brown, R), Dec., 324
Influence of specimen-reconstituting method on the undrained response of sand (Vaid, PV, Sivathayalan, S, and Sttedman, D), Sept., 187

Pore fluid
A Substitute Pore Fluid for Seismic Centrifuge Modeling (Dewoolkar, MM, Ko, HY, Stadler, AT, and Astaneh, SM), Sept., 196

Pressure
Changes in interface stresses during pullout tests on geogrid strip reinforcement (Hayashi, S, Shahu, JT, and Watanabe, K), March, 32

Pulp and paper
Application of TDR technology to water content monitoring of capillary barriers made of pulp and paper residues (Cabral, AR, Burnotte, F, and Lefebvre, G), March, 39

R

Reconstitution
Influence of specimen-reconstituting method on the undrained response of sand (Vaid, PV, Sivathayalan, S, and Sttedman, D), Sept., 187

Reflectometry
Cell size for water content-dielectric constant calibrations for time domain reflectometry (Suwansawat, S and Benson, CH), March, 3

Residual soil
Instrumentation of an unsaturated residual soil slope (Gasmo, J, Hritzuk, KJ, Rahardjo, H, and Leong, EC), June, 134

Residues
Application of TDR technology to water content monitoring of capillary barriers made of pulp and paper residues (Cabral, AR, Burnotte, F, and Lefebvre, G), March, 39

S

Sand
Plane strain strength and deformation of sands affected by batch variations and different apparatus types (Yasin, SJ, Umetsu, K, Tatsuoka, F, Arthur, JR, and Dunstan, T), March, 80

Preparation of epoxy impregnated sand coupons for image analysis (Jang, DJ, Frost, JD, and Park, JY), June, 153

Sand fabric
Influence of specimen-reconstituting method on the undrained response of sand (Vaid, PV, Sivathayalan, S, and Sttedman, D), Sept., 187

Sands
Determining the maximum density of sands by pluviation (Cresswell, A, Barton, ME, and Brown, R), Dec., 324
Ring shear tests on a carbonate sandy silt (Tika, TE), Dec., 342

Saturation
Relative moisture and moisture deficiency of desiccated expansive cohesive soil deposits (Hanafy, EA), Dec., 334

Scale factor
Capillary flow in the geotechnical centrifuge (Lord, AE), Dec., 292

Shear
A new torsional shear device (d'Onofrio, A, Silvestri, F, and Vinale, F), June, 107
Ring shear tests on a carbonate sandy silt (Tika, TE), Dec., 342

Shear strength
Shear banding in a sedimentary soft mudstone subjected to plane strain compression (Hayano, K, Maeshiro, T, Tatsuoka, F, Sato, T, Wang, L, and Kodaka, T), March, 67

Shear strength characterization of geosynthetic interfaces on inclined planes (Lalarakotoson, S, Villard, P., and Gourc, JP), Dec., 284

Shear stress
Non-linear behavior of lateral-loaded pile taking into account the shear stress at the sand (Belkhir, S, Mezazigh, S, and Levacher, D), Dec., 308

Shear test
Mechanical durability of expanded shale lightweight aggregate (Valsangkar, AJ and Holm, TA), Dec., 329

Silts
Ring shear tests on a carbonate sandy silt (Tika, TE), Dec., 342

Slope
Instrumentation of an unsaturated residual soil slope (Gasmo, J, Hritzuk, KJ, Rahardjo, H, and Leong, EC), June, 134

Slopes
Model studies of the 1988 Kettleman Hills landfill slope failure (Chang, MH, Mitchell, JK, and Seed, RB), March, 61

Soil behavior
A complex permittivity measurement system for undisturbed/compacted soils (Shang, JQ, Rowe, RK, Umana, JA, and Scholte, JW), June, 165

Soil tests
Fast and accurate techniques for determination of water content in soils (Mendozaz, MJ and Orozco, M), Dec., 301

Stiffness
A new torsional shear device (d'Onofrio, A, Silvestri, F, and Vinale, F), June, 107
Influence of reconsolidation techniques and strain rate on the stiffness of undisturbed clays from triaxial tests (LoPrersti, DC, Pallara, O, Cavallaro, A, and Jamiolkowski, M), Sept., 211

A triaxial testing system to evaluate stress-strain behavior of soils for wide range of strain and strain rate (Santucci de magistris, Koseki, J, Amaya, M, Hamaya, S, Sato, T, and Tatsuoka, F), March, 44

Strain
A new torsional shear device (d'Onofrio, A, Silvestri, F, and Vinale, F), June, 107
Constant rate of strain consolidation equipment and procedure for stabilized soils (Kassim, KA and Clarke, BG), March, 13

A triaxial testing system to evaluate stress-strain behavior of soils for wide range of strain and strain rate (Santucci de magistris, Koseki, J, Amaya, M, Hamaya, S, Sato, T, and Tatsuoka, F), March, 44

Stress
Changes in interface stresses during pullout tests on geogrid strip reinforcement (Hayashi, S, Shahu, JT, and Watanabe, K), March, 32

Plane strain strength and deformation of sands affected by batch variations and different apparatus types (Yasin, SJ, Umetsu, K, Tatsuoka, F, Arthur, JR, and Dunstan, T), March, 80

T

Tensiometer
The use of miniature pore pressure transducers in measuring matric suction in unsaturated soils (Muraleetharan, KK and Granger, KK), Sept., 226

Transient response
Discussion on "theoretical evaluation of the transient response of constant head and constant flow-rate permeability tests" by M. Zhang, M. Takahashi, R. H. Morin, and T. Esaki (Fox, PJ and Zhu, Y), Dec., 356

Transparent medium
Applied research using a transparent material with hydraulic properties similar to soil (Welker, AL, Bowders, JJ, and Gilbert, RB), Sept., 266

Triaxial
Time-dependent stress-strain behavior of soft Hong Kong marine deposits (Zhu, JG, Yin, JH, and Luk, ST), June, 118

Triaxial tests
Influence of reconsolidation techniques and strain rate on the stiffness of undisturbed clays from triaxial tests (LoPrersti, DC, Pallara, O, Cavallaro, A, and Jamiolkowski, M), Sept., 211

U

Unsaturated soils
Instrumentation of an unsaturated residual soil slope (Gasmo, J, Hritzuk, KJ, Rahardjo, H, and Leong, EC), June, 134
The use of miniature pore pressure transducers in measuring matric suction in unsaturated soils (Muraleetharan, KK and Granger, KK), Sept., 226

W

Water content
A complex permittivity measurement system for undisturbed/compacted soils (Shang, JQ, Rowe, RK, Umana, JA, and Scholte, JW), June, 165
Fast and accurate techniques for determination of water content in soils (Mendozaz, MJ and Orozco, M), Dec., 301

Water monitoring
Application of TDR technology to water content monitoring of capillary barriers made of pulp and paper residues (Cabral, AR, Burnotte, F, and Lefebvre, G), March, 39
